Flying faster

2.4G remote control

Long distance

EPP light flexible material
Crash-resistant

ALL shows 11V must be charged
Behind ALL shows that 12.V or more is fully charged.

Note: When the battery is not in use, the measuring instrument must be unplugged. Do not plug it in the aircraft for a long time.

There is no switch on the aircraft. If you do not pull it for a long time, the indicator light will empty the battery voltage and eventually cause damage to the battery. If the tester is plugged in reverse, it will not display.

The color of the battery package is based on the actual product received. the image is only a reference.

**Smooth body**

Designed according to aerodynamic principles, the lower wing can be removed to fly.

Strong power

The battery capacity is 200 mAh, an increase of 66.67%, and the motor speed is increased by 20%

Smooth flight

It is made of aviation plastic material, which is excellent, strong, anti-aging and wear-resistant.
